

Strategic Planning

- Additional Components/Modifications
 - Review and drafting by staff and teams through October 2016
- Feedback from Science Delivery and Conservation Design during 2016
- Updating Existing Science Needs
- Approval and Review by Steering Committee
- Alignment with SWAP Update RCN review
- Northeast Conservation Workshop, June 2017

Additional Components

Components beyond just the science components now included.

- Communications
 - Incorporate Communications Framework
- Science Delivery
 - Follow outline developed by the Science Delivery Team
- Coordination and Organization

Proposed Modifications

- Cross-border Conservation with Canada
- Enhanced Involvement with Tribes
- Cultural Resources
- Plant Conservation
- Urban/metropolitan Conservation
- Sustainable Agriculture and Forestry
- Identify and engage Additional Socio-economic Sectors
- Marine and Ocean Planning
- Work across LCC Borders
- Next steps for Information Management
- Implementation and Monitoring of Conservation Designs and Actions

Criteria for Additions to Strategic Plan

1. Addresses part of the **Northeast Conservation Framework** not yet addressed by LCC
2. Identified in **Strategic Investment Accountability Schedule (SIAS)** not yet addressed by LCC
3. Identified as critical in **LCC Network Strategic Plan** but not yet addressed by LCC
4. Best addressed at the **scale** of the LCC
5. Best addressed by LCC **partnership**
6. Best addressed through **lead role** by LCC
7. Critical to increasing the **relevancy and utility** of LCC products to LCC partners
8. **Inform applied conservation decisions** and actions by agencies, organizations and partnerships
9. **Priorities for existing partnerships** in the North Atlantic LCC.
10. **Address major threats and uncertainties** to sustaining natural or cultural resources
11. **Components/needs that LCC partners are willing to help develop strategy for**
